

CONTENTS

Keynote addresses from Materials Congress '98

1 Editorial

SESSION ON 'GROWTH AND PROCESSING OF MATERIALS FOR ELECTRONICS'

2 Epitaxy growth mechanisms

D. W. Pashley

SESSION ON 'ADVANCES IN PHYSICAL METALLURGY'

9 Pattern formation in solidification

J. D. Hunt

15 Alloy design: from composition to through process models

A. A. Howe and D. C. J. Farrugia

22 Some phase transformations in steels

H. K. D. H. Bhadeshia

30 Precipitation hardening in metals

T. Gladman

37 New analysis of recovery, recrystallisation, and grain growth

F. J. Humphreys

45 Phase equilibria and transformations in titanium aluminides

H. M. Flower and J. Christodoulou

53 Growth of recrystallising grains in boron doped $\text{Ni}_{76}\text{Al}_{24}$

A. K. Jena, A. Shyam, and M. C. Chaturvedi

57 Tensile properties and microstructure of Ti-48Al-2W-0.5Si γ -titanium aluminide at temperatures between room temperature and 800°C

V. Recina and B. Karlsson

67 Improvement of formability of leaded α brass during hot working

T. Yano, X. Ling, K. Higashida, and R. Onodera

73 Comparison of wear, tensile, and fatigue properties of PVD coated materials

Y. L. Su, S. H. Yao, C. S. Wei, C. T. Wu, and W. H. Kao

78 Structure and mechanical properties of two Mg-Al-Ca alloys consolidated from atomised powder

B. Shaw and H. Jones

85 Effect of preroll quenching and post-roll quenching on production and properties of ultrafine ferrite in steel

M. R. Hickson and P. D. Hodgson

91 Re-evaluation of the Monkman-Grant relationship for 2.25Cr-1Mo steel using creep data from the National Research Institute for Metals

M. Evans

101 Precipitation behaviour in heat affected zone of welded superaustenitic stainless steel

S. Heino, E. M. Knutson-Wedel, and B. Karlsson

109 Laser transformation hardening of steel: effects of beam mode, beam size, and composition

R. C. Reed, Z. Shen, J. M. Robinson, and T. Akbay

121 Influence of thermomechanical processing and accelerated cooling on microstructures and mechanical properties of plain carbon and microalloyed steels

A. P. Singh, A. Prasad, K. Prakash, D. Sengupta, G. M. D. Murty, and S. Jha

127 High temperature mechanical behaviour of δ - γ stainless steel

J. A. Jiménez, F. Carreño, O. A. Ruano, and M. Carsi

132 Growth and characterisation of KNbO_3 single crystals

R. Ilangoan, S. Balakumar, and C. Subramanian

137 Determination of dynamic fracture toughness of heat affected zone of 9Cr-1Mo steel from instrumented drop weight tests

A. Moitra, S. K. Ray, and S. L. Mannan

101 Precipitation behaviour in heat affected zone of welded superaustenitic stainless steel

S. Heino, E. M. Knutson-Wedel, and B. Karlsson

109 Laser transformation hardening of steel: effects of beam mode, beam size, and composition

R. C. Reed, Z. Shen, J. M. Robinson, and T. Akbay

121 Influence of thermomechanical processing and accelerated cooling on microstructures and mechanical properties of plain carbon and microalloyed steels

A. P. Singh, A. Prasad, K. Prakash, D. Sengupta, G. M. D. Murty, and S. Jha

127 High temperature mechanical behaviour of δ - γ stainless steel

J. A. Jiménez, F. Carreño, O. A. Ruano, and M. Carsi

132 Growth and characterisation of KNbO_3 single crystals

R. Ilangoan, S. Balakumar, and C. Subramanian

137 Determination of dynamic fracture toughness of heat affected zone of 9Cr-1Mo steel from instrumented drop weight tests

A. Moitra, S. K. Ray, and S. L. Mannan

- 144 Microstructural evolution in silicon alloyed γ -Ti-Al alloys after thermomechanical processing
S. Heshmati-Manesh and H. M. Flower
- 151 Effect of aluminium on deformation structure of highly stabilised β -Ti-V-Cr alloys
Y. G. Li, P. A. Blenkinsop, M. H. Loretto, and N. A. Walker
- 157 Effects of grain size on development of athermal and strain induced ϵ martensite in Co-Cr-Mo implant alloy
P. Huang and H. F. López
- 165 Evolution of dislocation structure induced by cyclic deformation in a directionally solidified cobalt base superalloy
Z. Lu, Y. B. Xu, and Z. Q. Hu
- 169 Effects of rare earth additions on structures and properties of rapidly solidified copper alloys
L. K. Tan, Y. Li, S. C. Ng, and L. Lu
- 180 Microstructural evolution and plastic stability during superplastic flow in a 7475 aluminium alloy
H. Iwasaki, T. Mori, M. Mabuchi, and K. Higashi
- 185 Nucleation and growth of recrystallisation in Al-1Mg during thermomechanical processing
P. L. Orsetti Rossi and C. M. Sellars
- 193 Static recrystallisation and hot strength of Al-1Mg during thermomechanical processing
P. L. Orsetti Rossi and C. M. Sellars
- 202 Influence of welding on structure of Al-Mg-Si matrix composites
H. W. de Vries and G. den Ouden
- 207 Transient liquid phase bonding of a Hf bearing single crystal nickel aluminide to MM247 superalloy
Y. Guan and W. F. Gale
- 213 Castability of directionally solidified nickel base superalloys
K. Heck, J. R. Blackford, and R. F. Singer
- 221 Surface finish and lubrication at low cutting speeds
M. B. da Silva and J. Wallbank
- 226 Size distribution of spray atomised aluminium alloy powders produced during linear atomisation
Y. Zhou, S. Lee, V. G. McDonell, G. S. Samuelsen, R. L. Kozarek, and E. J. Lavernia
- 237 Influence of heat treatment on grain boundary microstructure in a Ni-16Cr-10Fe-0.022C model material
M. Thuvander, K. Stiller, and E. Olsson
- 246 Relationship between coincidence site lattice, boundary plane indices, and boundary energy in nickel
V. Randle
- 253 Mechanisms of graphite formation in ductile cast iron containing rare earth metals
M. I. Onsoien, Ø. Grong, T. Skaland, and K. Jørgensen
- 260 Low cycle fatigue behaviour of low carbon microalloyed steel: microstructural evolution and life assessment
V. Subramanya Sarma, K. A. Padmanabhan, A. Gueth, and A. Koethe
- 265 Influence of matrix structure on physical properties of an alloyed ductile cast iron
H. Bayati and R. Elliott
- 278 Influence of Ti on hot ductility of C-Mn-Al steels
R. Abushosha, O. Comineli, and B. Mintz
- 287 Gaussian process modelling of austenite formation in steel
C. A. L. Bailer-Jones, H. K. D. H. Bhadeshia, and D. J. C. MacKay
- 295 Interpretation of hot plane strain compression testing of aluminium specimens
N. J. Silk and M. R. van der Winden
- 301 Initiation of intergranular cracking and other corrosion assisted fracture paths in two precipitation hardening aluminium alloys
P. J. E. Forsyth
- 309 Microstructure and properties of superplastically formed aluminium alloy 7475 pans
M. G. Zelin and S. Guillard
- 316 Microstructural characterisations in transient liquid phase zone of activated diffusion brazed nickel base superalloy
C. Y. Su, C. P. Chou, B. C. Wu, and W. C. Lih

- 323 Microstructural characterisation of laser clad coating of nickel based alloy with dissolved SiC_p
Q. Li, T. C. Lei, Y. B. Chen, J. H. Ouyang, D. Z. Yang, and Y. Zhou
- 328 Cast microstructure and dispersoid formation in spray deposited Al-Li alloys
A. Gholinia and P. B. Prangnell
- 337 Slurry erosion of metallics, polymers, and ceramics: particle size effects
M. M. Stack and N. Pungwiwat
- 345 Effect of Cr- and Y-implantation on oxidation behaviour of powder metallurgical Ni_3Al
P. Pérez, J. L. González-Carrasco, P. Adeva, V. A. C. Haanappel, and M. F. Stroosnijder
- 352 *Technical note* Fabrication of alumina dispersion strengthened copper strips by internal oxidation and hot roll bonding
S.-H. Kim and D. N. Lee
- 357 *Overview* Characteristics of creep deformation in discontinuously reinforced metal matrix composites
Y. Li and T. G. Langdon
- 366 A mechanism for effect of vanadium on the hardenability of medium carbon manganese steel
H. Adrian
- 379 Microstructure and shape memory properties of Fe-14Ru alloy
J.-H. Jun, H.-C. Shin, and C.-S. Choi
- 382 New perspective on slip band decohesion as a unifying fracture event during fatigue crack growth in both short and long cracks
M. D. Halliday, P. Poole, and P. Bowen
- 391 Development of microstructure during heat treatment of high carbon Cr-Mo steel
M. Mujahid, M. I. Qureshi, and M. Ali
- 397 Fatigue crack propagation in Ti_3Al based alloys
X. Wu and P. Bowen
- 408 Influence of microstructural instabilities on elevated temperature creep deformation of Inconel 690
V. Venkatesh and H. J. Rack
- 413 Diffusion of sulphur on to oxidised free surface of polycrystalline nickel via emergent grain boundaries
J. Ritherdon and G. J. Tatlock
- 419 Ability of aluminium alloys to wet alumina fibres by addition of bismuth
A. Papworth and P. Fox
- 429 Steady state creep deformation behaviour of SiC particle reinforced 2618 aluminium alloy based composites
S. C. Tjong and Z. Y. Ma
- 437 Preparation of TiC reinforced steel composites and their characterisation
R. K. Galgali, H. S. Ray, and A. K. Chakrabarti
- 443 Extrusion characteristics of aluminium alloy/ SiC_p metal matrix composites
R. K. Goswami, R. Sikand, A. Dhar, O. P. Grover, U. C. Jindal, and A. K. Gupta
- 450 Enhancement of mechanical properties of Al-Mg-Si alloys by means of manganese dispersoids
D. H. Lee, J. H. Park, and S. W. Nam
- 456 Non-thermal production of tungsten from scheelite
N. J. Welham
- 459 *Technical note* Temperature changes occurring during extrusion of metals: comparison of bulk, numerical, and integral profile predictions with experimental data
T. Sheppard
- 464 *Short Communication* Wide gap transient liquid phase bonding of NiAl-Hf to a nickel base superalloy
W. F. Gale and Y. Guan
- 468 *Short Communication* Cyclic deformation behaviour of [023] oriented $\text{Ni}_3\text{Al(B)}$ single crystals
G. P. Zhang, Z. G. Wang, and G. Y. Li
- 471 *Short Communication* Real and extended volumes in simultaneous transformations
T. Kasuya, K. Ichikawa, M. Fuji, and H. K. D. H. Bhadeshia
- 477 Kinetics of grain growth in 0.1 at.-%B doped nickel aluminide containing 23.2 at.-%Al
M. N. Mungole, A. K. Jena, and M. C. Chaturvedi
- 481 Peritecticlike precipitation of titanium carbide in Al-Ti-C melts at 1373 K
A. E. W. Jarfors

- 495 Equiaxed solidification of Al-Si alloys
J. E. C. Hutt, D. H. StJohn, L. Hogan, and A. K. Dahle
- 501 Process technology, properties, and microstructure of hot rolled rare earth-transition metal-boron permanent magnets
M. Ferrante, E. de Freitas, and V. Sinka
- 510 Resulting morphologies on quenching of titanium aluminide alloys
C. R. de Farias Azevedo and H. M. Flower
- 518 Effect of austenite grain size and bainite morphology on overall kinetics of bainite transformation in steels
A. Matsuzaki and H. K. D. H. Bhadeshia
- 523 A technique for prediction of carbonitride precipitation in high strength low alloy steels
S. Ranganathan
- 527 Effect of Si on mechanical properties of low alloy steels
W. J. Nam and H. C. Choi
- 531 Influence of molybdenum on austempering behaviour of ductile iron
Part 1 - Austempering kinetics and mechanical properties of ductile iron containing 0.13%Mo
S. Yazdani and R. Elliott
- 541 Influence of molybdenum on austempering behaviour of ductile iron
Part 2 - Influence of austenitising temperature on austempering kinetics, mechanical properties, and hardenability of ductile iron containing 0.13%Mo
S. Yazdani and R. Elliott
- 547 Theoretical design of ferritic creep resistant steels using neural network, kinetic, and thermodynamic models
F. Brun, T. Yoshida, J. D. Robson, V. Narayan, H. K. D. H. Bhadeshia, and D. J. C. MacKay
- 555 Detrimental effect of nitride and aluminium oxide inclusions on fatigue life in rotating bending of bearing steels
A. Melander and P. Ölund
- 563 Improvement of formability of carbide dispersed titanium alloy during hot working
T. Yano, T. Adachi, T. Yokote, and R. Onodera
- 569 Microstructure of SiC_w reinforced Al-12Ti composites prepared by powder metallurgical technique
Y. Zhou and D. C. Jia
- 575 Improvement in high temperature oxidation resistance of TiAl-Mn intermetallic compound by preoxidation in CO-CO₂ gas mixture
S. Kim, D. Lee, and I. Kim
- 583 Production of Si₄₅Al₂₀Fe₁₀Ni₅Cr₅Zr₅ bulk amorphous alloy by hot pressing
D. V. Louzguine, Y. Kawamura, and A. Inoue
- 586 Theory of pressure solution by indentation and in porous solids
B. Burton
- 596 *Technical note* Relationship between degeneration of M₇C₃ and precipitation of M₂₃C₆ in a cobalt base superalloy
W. H. Jiang, X. D. Yao, H. R. Guan, and Z. Q. Hu
- 599 *Short Communication* Modelling of constitutive equations to describe hot deformation of 99.9% pure aluminium
S. V. S. Narayana Murty and B. Nageswara Rao
- 605 Ultrafine grain structures formed by thermomechanical processing of spray cast Al-Li alloys
A. Gholinia, J. Sarkar, P. J. Withers, and P. B. Prangnell
- 616 Thermal stability of Al/Al₁₁Ce₃ and Al/Al₁₁La₃/Al₃Ni eutectics obtained by Bridgman growth
A. Haworth, W. M. Rainforth, and H. Jones
- 621 Rare earth metal induced modification of γ -M₂C, γ -M₆C, and γ -MC eutectics of as cast M2 high speed steel
M. Boccalini Jr, A. V. O. Corrêa, and H. Goldenstein
- 627 Precipitation of molybdenum carbide in steel: multicomponent diffusion and multicomponent capillary effects
N. Fujita and H. K. D. H. Bhadeshia
- 635 Effect of strain on recrystallisation-precipitation interaction in low vanadium microalloyed steel
A. B. Quispe, S. F. Medina, J. M. Cabrera, and J. M. Prado

- 643 Thermal effects due to tempering of austenite and martensite in austempered ductile irons
M. Baricco, G. Franzosi, R. Nada, and L. Battezzati
- 647 Method for improving parametric creep rupture life of 2.25Cr-1Mo steel using artificial neural networks
M. Evans
- 659 Critical time and temper embrittlement isotherms
T. Xu
- 666 Static and cyclic creep behaviour of SiC whisker reinforced aluminium composites
S. C. Tjong, Z. Y. Ma, and Z. G. Wang
- 673 Model of grain boundary sliding and its relevance to optimal structured superplasticity
Part 5 - A unique numerical solution and its reliability
F. U. Enikeev, K. A. Padmanabhan, and S. S. Bhattacharya
- 683 Synthesis of fine Pb-50 vol.-%Sn alloys by a new process of reciprocating extrusion
S. Y. Yuan, C. H. Peng, and J. W. Yeh
- 689 Room temperature deformation and recrystallization behaviour of lead and lead-tin alloys in torsion and plane strain compression
S. F. Wong, P. D. Hodgson, and P. F. Thomson
- 697 Assessment and modelling of isothermal forging of intermetallic compounds
Part 1 - TiAl
J. C. F. Millet, J. W. Brooks, and I. P. Jones
- 705 Multifractal analysis of metallic surface structure changes during mechanical treatment
A. G. Kolmakov and G. V. Vstovsky
- 711 Effect of aging on quality index of Al-Cu casting alloy
C. H. Cáceres, T. Din, A. K. M. B. Rashid, and J. Campbell
- 717 Retrogression and re-aging of 7010 open die forgings
J. S. Robinson, S. D. Whelan, and R. L. Cudd
- 725 Variation in as cast and aged structures of centrifugally cast heat resistant steel solidified in an electromagnetic field and under different cooling conditions
X. Q. Wu, Y. S. Yang, Q. Zhan, and Z. Q. Hu
- 733 Effect of homogenisation treatment on segregation of silicon in ferritic ductile irons:
a colour metallographic study
C. F. Yeung, H. Zhao, and W. B. Lee
- 738 Model for growth and coarsening of two phase systems under diffusional control
M. P. Jackson and R. C. Reed
- 750 Lattice compatibility at interfaces after recrystallisation
V. Randle and R. Davies
- 755 Preparation of Y₂O₃ stabilised ZrO₂ ceramic nanopowders by surface doping
B. Xia, L. Duan, Y. Xie, and Y. Tang
- 761 Differential scanning calorimetry and energy dispersive spectrometry studies of phase transformations in supersaturated Al-39.5 at.-%Zn alloy
A. Gaber
- 767 Direct observation of ternary solid state transformation in the Bi-Cd-In alloy system
L. Snugovsky, D. D. Perovic, and J. W. Rutter
- 773 Initial stage of isothermal decomposition of austenite to ferrite and graphite in spheroidal graphite cast iron
F. Hellal, J. Lacaze, and A. Hazotte
- 779 Mechanomaking of nanostructured hypereutectic white irons: powder fabrication
P. Matteazzi and F. Wolf
- 791 Serrated yielding in 9Cr-1Mo ferritic steel
B. K. Choudhary, K. Bhanu Sankara Rao, S. L. Mannan, and B. P. Kashyap
- 798 Determination of potency factor of cobalt for estimation of nickel equivalent in 16Cr-2Ni martensitic stainless steel
K. P. Balan, K. V. Rama Rao, A. Venugopal Reddy, and D. S. Sarma
- 803 Flow stress and recrystallisation during hot deformation of Cu-9%Sn alloys
B. Bayle, Ph. Bocher, J. J. Jonas, and F. Montheillet

- 812 Effect of processing variables on structure and tensile properties of investment cast Al-Si-Mg casting alloy
L. Siaminwe and A. J. Clegg
- 821 Compressive failure of alumina continuous fibre reinforced Al-4.5 wt-%Cu alloy at elevated temperatures
H.-N. Liu and K. Ogi
- 827 Stiffness of particulate reinforced metal matrix composites with damaged reinforcements
B. Y. Zong, X.-H. Guo, and B. Derby
- 833 Mechanical behaviour of a bimodal microstructured powder metallurgy Ni₃Al
P. Pérez, J. A. Jiménez, A. Borrego, and P. Adeva
- 840 Microstructures and mechanical properties of an investment cast gamma titanium aluminide
J. P. Kuang, R. A. Harding, and J. Campbell
- 851 Influence of solder thickness on interfacial structures and fatigue properties of Cu/Sn/Cu joints
H. Kato, S. Horikawa, and K. Kageyama
- 861 After Concorde: evaluation of creep resistant Al-Cu-Mg-Ag alloys
I. J. Polmear, G. Pons, Y. Barboux, H. Octor, C. Sanchez, A. J. Morton, W. E. Borbidge, and S. Rogers
- 869 Microstructure and phase relationships in Ti-Al-Si system
C. R. de Farias Azevedo and H. M. Flower
- 878 Fracture toughness of austempered chilled ductile iron
J. Hemanth
- 885 Influence of molybdenum on austempering behaviour of ductile iron
Part 3 - Austempering kinetics, mechanical properties, and hardenability of ductile iron containing 0.25%Mo
S. Yazdani and R. Elliott
- 896 Influence of molybdenum on austempering behaviour of ductile iron
Part 4 - Austempering behaviour of ductile iron containing 0.45%Mo
S. Yazdani and R. Elliott
- 903 Fatigue performance and microanalysis of heat treated duplex 2205 stainless steel
K. J. Stevens
- 909 Tensile behaviour of duplex stainless steel at low temperatures
J. He, G. Han, S. Fukuyama, and K. Yokogawa
- 921 Step growth of a primary silicon crystal observed by decantation during centrifugal casting
Q.-d. Wang, W.-j. Ding, and J.-z. Jin
- 926 Strength and fracture toughness of spray formed Al-Cu-Mg-Ag alloys
L. Eschbach, C. Solenthaler, P. J. Uggowitzer, and M. O. Speidel
- 933 Erosion-corrosion characteristics of squeeze cast aluminium alloy/SiC composites in water and sodium chloride solutions containing sand
O. P. Modi, B. K. Prasad, Rupa Dasgupta, A. K. Jha, and D. P. Mondal
- 939 Thixoforming of a novel layered metal matrix composite
A. R. A. McLelland, H. V. Atkinson, and P. R. G. Anderson
- 946 Transient liquid phase diffusion bonding of oxide dispersion strengthened nickel alloy MA758
A. Ekrami and T. I. Khan
- 951 Interfacial precipitation in hot isostatically pressed diffusion bonds of 17-4 PH stainless steel
M. A. Ashworth and M. H. Jacobs
- 957 Microstructural characteristics of iron based alloy laser clad on Al-Si alloy
A. H. Wang, C. S. Xie, and J. H. Nie
- 965 Influence of welding parameters on microstructures and mechanical properties of electron beam welded aluminium-lithium plates
S. C. Chen and J. C. Huang
- 981 Semisolid deformation of aluminium alloy 356 with non-dendritic structure
C. P. Chen and C.-Y. A. Tsao
- 986 Influence of silicon and magnesium on grain refinement in aluminium alloys
S. A. Kori, B. S. Murty, and M. Chakraborty
- 993 Influence of copper addition on precipitation kinetics and hardening in Al-Zn-Mg alloy
A. Deschamps, Y. Bréchet, and F. Livet

- 1001 Effect of niobium and titanium on tin precipitation in Fe alloys
X. Li, A. Watson, R. Brydson, A. Jha, and R. C. Cochrane
- 1009 Interaction between precipitation, normal grain growth, and secondary recrystallisation in austenitic stainless steel containing particles
A. F. Padilha, J. C. Dutra, and V. Randle
- 1015 Microstructure and microtexture changes during solution nitriding to produce austenitic case on ferritic-austenitic duplex stainless steel
A. F. Padilha, V. Randle, and I. F. Machado
- 1019 Comparison of simulated and experimental strain ratio R for different grain shapes in sheet metal
A. Pańta and K. Chruściel
- 1024 Three-dimensional diffusion model for austenitisation of ferritic spheroidal graphite irons
J. Zimba, D. Henwood, E. Navara, and D. J. Simbi
- 1031 Damage mechanisms of coated systems under thermomechanical fatigue
Y. H. Zhang, P. J. Withers, M. D. Fox, and D. M. Knowles
- 1037 Fatigue properties and microstructure of Al-Si-Cu system casting alloys
T. Kobayashi, T. Ito, Q. Yao, and N. Fatahalla
- 1044 Interfacial reaction and its effect on strength of $\text{Al}_{18}\text{B}_4\text{O}_{33}/\text{Al}$ composites
J. Pan, G. Sasaki, L. J. Yao, M. Yoshida, and H. Fukunaga
- 1049 Effect of microstructure and heat treatment on fracture behaviour of smooth and precracked tensile specimens of Ti6Al4V
D. Hardie and S. Ouyang
- 1058 Influence of titanium and nitrogen on hot ductility of C-Mn-Nb-Al steels
O. Comineli, R. Abushosha, and B. Mintz
- 1069 Strength and impact behaviour of age hardenable copper containing steels
L. Skoufari-Themistou, D. N. Crowther, and B. Mintz
- 1080 Friction welding process of 5052 aluminium alloy to 304 stainless steel
S. Fukumoto, H. Tsubakino, K. Okita, M. Aritoshi and T. Tomita
- 1087 Processing, microstructure, strength, and ductility relationships in ultrahigh carbon steel assessed by high strain rate tension testing
M. Carsi, A. Fernández-Vicente, O. A. Ruano, and O. D. Sherby
- 1101 Tensile properties of helical diamond fibres with platinum wire core
P. G. Partridge, L. Humberstone, J. B. Doble, C. J. Gilmore, and H. S. Ubhi
- 1110 Formation of microstructure during solidification of Bi-Pb-Sn ternary eutectic
M. A. Ruggiero and J. W. Rutter
- 1115 Grain refinement of Al-Ti-B alloys in aluminium melts: a study of the mechanisms of poisoning by zirconium
A. M. Bunn, P. Schumacher, M. A. Kearns, C. B. Boothroyd, and A. L. Greer
- 1124 Desmutting of aluminium alloy 2024-T3 using rare earth electrolyte
A. E. Hughes, K. J. H. Nelson, and P. R. Miller
- 1133 Precipitate coarsening during overaging of Al-Zn-Mg-Cu alloy
R. C. Dorward
- 1139 Influence of processing parameters during disintegrated melt deposition processing on near net shape synthesis of aluminium based metal matrix composites
L. M. Tham, M. Gupta, and L. Cheng
- 1147 Fatigue of precipitate strengthened Cu-Ni-Si alloy
S. A. Lockyer and F. W. Noble
- 1154 Effect of alloying modification on superplastic deformation properties of Ti-4Mo-4Al-2Sn-0.5Si (IMI550)
M. Tuffs and C. Hammond
- 1167 Mechanical behaviour of strain aged dual phase steels
A. J. Abdalla, L. R. O. Hein, M. S. Pereira, and T. M. Hashimoto
- 1171 Structural characteristics of low temperature plasma carburised austenitic stainless steel
Y. Sun, X. Li, and T. Bell

- 1179 Hot ductility curve of an austenitic stainless steel and importance of dynamic recrystallisation in determining ductility recovery at high temperatures
B. Mintz, A. Cowley, R. Abushosha, and D. N. Crowther
- 1186 Metal flow behaviour of wide flat bar in the spreading extrusion process
Y. Imamura, N. Takatsuji, K. Matsuki, M. Tokizawa, K. Murotani, and H. Maruyama
- 1191 Finite element model of steel oxide failure during tensile testing under hot rolling conditions
M. Krzyzanowski and J. H. Beynon
- 1199 Microstructural degradation of plain and platinum aluminide coatings on superalloy CM247 during isothermal oxidation
D. K. Das, Manish Roy, Vakil Singh, and S. V. Joshi
- 1209 Role of ferrite/pearlite banded structure and segregation on mechanical properties of microalloyed hot rolled steel
F. A. Khalid, M. Farooque, A. ul Haq, and A. Q. Khan
- 1216 *Short Communication* Resistance parameters and water quench test as criteria of thermal shock behaviour of alumina based refractories
T. Volkov-Husović and Z. Popović
- 1221 Relationship between η phase formation and solidification rate in directionally solidified IN792 + Hf alloy
W. R. Sun, J. H. Lee, S. M. Seo, S. J. Choe, and Z. Q. Hu
- 1225 Thermal and electrical properties of FeNi/Cu composites
Y. J. Zhang, Z. F. Wang, N. L. Wang, G. S. Jiang, W. J. Lu, and J. Zhu
- 1230 Creep-fatigue crack growth of intermetallic compound Ni₃Al(B) at elevated temperatures
G. P. Zhang and Z. G. Wang
- 1236 Microstructure and tensile properties of graded Al-Mg₂Si *in situ* composites fabricated by centrifugal casting
J. Zhang, Y.-Q. Wang, and B.-L. Zhou
- 1241 Formability of two aluminium alloys
D. Ravi Kumar and K. Swaminathan
- 1253 Influence of microstructures on press bonding of 5083 aluminium alloys
H. Y. Wu
- 1259 Stored energy in can body aluminium alloy after cold rolling and stress relieving
N. Rajmohan and J. A. Szpunar
- 1266 Non-equilibrium primary crystallisation in silver-germanium alloy under microgravity conditions
D. Vojtěch, Č. Barta, Č. Barta, Jr, G. P. Görlér, G. Otto, and K. Wittmann
- 1273 Effect of epitaxial ferrite on yielding and plastic flow in dual phase steel in tension and compression
M. Erdogan and R. Priestner
- 1285 Superplastic behaviour of commercial duplex stainless steel SAF 2304
J. L. Song and P. L. Blackwell
- 1293 Evolution of substructure during continuous rolling of microalloyed steel strip
F. Vodopivec, S. Rešković, and I. Mamuzić
- 1301 Effect of nickel and tin additions on formation of liquid phase in copper bearing steels during high temperature oxidation
S. Akamatsu, T. Senuma, Y. Takada, and M. Hasebe
- 1308 X-ray investigation of carbide precipitation in 2-25Cr-1Mo steel for predicting remaining life of boiler components after extended service in fossil fuel fired power stations
V. Jayan, P. K. Mandal, M. Hirani, and S. K. Sanyal
- 1317 Characterisation of zirconium alloys by identification of intermetallic particles and fully automatic measurement of particle size distribution using secondary electron imaging in scanning transmission electron microscope
P. Liu and C. Ulfvin
- 1324 Tribological behaviour of cast and wrought Co-Cr-Mo implant alloys
P. Huang, A. Salinas-Rodriguez, and H. F. López
- 1331 Microstructure and bond strength of Ni-Cr steel/Al₂O₃ joints brazed with Ag-Cu-Zr alloys containing Sn or Al
Y. C. Yoo, J. H. Kim, and K. Park

- 1335 A novel theoretical model of stress-electrical potential hysteresis loop during fatigue
M. Javed Hyder, L. F. Coffin, and D. A. Woodford
- 1341 Changes in γ -TiC stoichiometry during heat treatment of TiC reinforced Ti composites
S. Riaz and H. M. Flower
- 1349 Development of physical vapour deposited Mg-Zr alloys
Part 1 - Characterisation of as deposited alloys
S. Diplas, P. Tsakirooulos, and R. M. D. Brydson
- 1359 Development of physical vapour deposited Mg-Zr alloys
Part 2 - Characterisation of corrosion products
S. Diplas, P. Tsakirooulos, R. M. D. Brydson, and J. F. Watts
- 1373 Development of physical vapour deposited Mg-Zr alloys
Part 3 - Comparison of alloying and corrosion behaviour in Mg-V and Mg-Zr physical vapour deposited alloys
S. Diplas, P. Tsakirooulos, and R. M. D. Brydson
- 1379 Effect of aging on high strain rate and temperature properties of 7075 aluminium alloy
W. S. Lee, W. S. Sue, C. F. Lin, and C. J. Wu
- 1387 Continuous γ' precipitation in directionally solidified IN738 LC alloy
R. Rosenthal and D. R. F. West
- 1395 Creep deformation and rupture of nickel base superalloy CM247LC under variable loading
G. A. Osinkolu, M. Maldini, and M. Marchionni
- 1401 Microstructure and mechanical properties of Al-Mg alloy sheets for autobody application
D. M. Jiang, S. B. Kang, and H. W. Kim
- 1408 Effects of titanium and boron addition on microstructure of superplastic Cr-Mo steels
M. Aramaki, R. Onodera, H. Era, and K. Kishitake
- 1414 Grain refinement of steel by oxidic second phase particles
T. Gladman, G. Fourlaris, and M. Talafi-Noghani
- 1425 Chromium interaction with TiO_2 dispersoids in oxide dispersion strengthened ferritic steel
A. V. Krajnikov, H. M. Ortner, S. Weinbruch, W. Grogger, P. Warbichler, F. Hofer, and Y. M. Yurchenko
- 1433 Interpretation of creep behaviour of a 9Cr-Mo-Nb-V-N (T91) steel using threshold stress concept
S. Spigarelli, E. Cerri, P. Bianchi, and E. Evangelista
- 1441 Effects of yttrium on sliding wear of 304 stainless steel in dilute sulphuric acid and air
T. C. Zhang and D. Y. Li
- 1447 Oxidation behaviour of nanocrystalline Fe-Ni-Cr-Al alloy coatings
Z. Lui, W. Gao, and Y. He
- 1451 Microstructural and electrochemical studies in thermally aged type 316LN stainless steels
U. Kamachi Mudali, P. Shankar, D. Sudararaman, and R. P. Dayal
- 1454 *Technical note* Triboelectricity and some associated phenomena
G. R. Freeman and N. H. March

Book reviews

pages 474, 601, 857, 1096, 1337

Conference diary

pages 119, 235, 355, 475, 603, 731, 859, 979, 1098, 1219, 1339, 1459
